

EMS

Smart Energy Management System

Friendly Interface

- All system in one Application
- Compatible with third party devices

Everything in Control

- Multi assets in one Account
- Real-time and historical data at project, array and device level

Smart Scheduling

- Intelligent Solar, BESS and load forecasting
- Intelligent scheduling algorithm

Smart O&M

- Asset status in one page
- Report and alarm subscribe management supported

This datasheet is intended solely as a reference for product selection. Product specifications, parameters and functions may change due to version upgrades. The final technical specifications shall be based on the contract.
